Election/Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a catalyst

Group II, claims 29-33, drawn to a catalyst composition

Group III, claim(s) 14-28, drawn to a hydrotreating process.

Group IV, claim(s) 34-39, drawn to a hydrodesulfurization process.

The inventions listed as Groups I and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: there is no shared technical feature because the catalyst employed in the claimed process is not identically claimed.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: there is no shared technical feature because the catalyst recited in the two sets of claims is not coextensive in scope.

The inventions listed as Groups I and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: there is no shared technical feature because the catalyst employed in the claimed process is not identically claimed.

The inventions listed as Groups II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the shared technical feature is the catalyst which is considered to be anticipated by and/or obvious over U.S. Patent Nos. 4,367,137 or 4,359,406.
